Data Management

Collect and analyze data; generate aggregate and client specific reports.

Overview:

Our state-of-the-art, HIPAA-compliant information technology system incorporates clinical, administrative, provider, referral and claims data into one system. From this system, we're able to provide data management, reporting and analysis capabilities that can be tailored to the specific needs of each of our partners, ensuring access to the information most important for evolving programs and making decisions. Since our information technology system is web-based, our partners can have secure access to requested data in real-time from any internet-connected computer. In fact, gaining access to information that can identify trends in customer demographics, service trends and costs is a powerful tool for evolving business strategies and realigning organization positioning for long-term success.
