

ASPENPOINTE

SINCE 1875...

Health Care Professionals

The evidence is conclusive. With help, you can improve the outcomes of your depressed patients while easing your workload.

The evidence is conclusive. Health care professionals are busy providing quality care to as many patients as possible. With Telecare's partnership, we can help by supporting the plan you have with your patient. With our added support, you will see improvements in the health and well being of your patients, while easing your workload. TeleCare is here to help!

Good depression care takes time and can cause a busy office schedule to spin out of control for the rest of the day. With an offsite Depression Care Manager, you make the diagnosis and start treatment, knowing that a skilled professional at no expense to you will:

- Educate the patient about depression and its treatment
- Repeatedly monitor the patient's response to treatment
- Alert you if the patient fails to improve

Clinical trials demonstrate better outcomes for patients who participate in Depression Care Management, thereby increasing efficiency in treating patients with depression. Let Depression Care Management provide your patients the education and coordinated follow-up care they need to get on with their lives.

Since 1875, ASPENPOINTE has empowered clients, enriched lives and embraced purpose through individual and family services in mental health, substance abuse, employment & career development, education, housing, jail diversion & reintegration, telephonic wellness, and provider network services.
